What is the MO Project?

This contest is a chance for you to show your creativity and be part of a movement – people all over the state of California are working to make neighborhoods healthier. Think about what's working in your community, what's not working, and how you would make it better. How can you and your community improve health? Your submission must focus on what "We" can do – not "Me" changes like 'eat better' or 'exercise more.'
